

Kirkcaldy Kids in reading frenzy!

VALLEY PRIMARY SCHOOL, KIRKCALDY

Such is the success of Accelerated Reader that the pupils and teachers of Valley Primary School have started a reading frenzy at their school and this has made the school so successful in getting kids to read!

Accelerated Reader is motivational reading software that is currently in over 50,000 schools worldwide. In addition to enthusing pupils to read more and better books it has additional benefits for all other subjects.

Lorna Palmer, Assistant Headteacher at Valley Primary School, says,

"The Accelerated Reading program has been very successfully introduced in Valley Primary School. Our main aim was to raise standards in our pupils' reading by promoting independent reading as an enjoyable activity out of school as well as in school. Home-school links have been further developed through increased parental involvement with their children's reading. Feedback from parents has been very positive."

"The use of Accelerated Reader, which combines computer technology with reading assessment, has motivated pupils to increase the number of books they are reading whilst encouraging them to remember and recount significant details. Our pupils' increased enthusiasm for reading is evident to all."
